

Content Discovery Starts Here

Viewers are spending up to 23 minutes a day trying to find content they want to watch. Pay-TV operators, publishers, OTT providers and more can increase ARPU and engagement rates by creating a content discovery experience that connects viewers to the content they want to see faster. Internet Video Archive provides the entertainment data needed to construct best-in-class content discovery experiences.

Entertainment Your Way

For 15 years, Internet Video Archive has supported web publishers, app builders, theatre operators, OTT services, CE companies, and pay-TV operators to make successful interfaces that engage their viewers and increase their revenue by leveraging interest in movie, TV shows, video games and celebrities.

Solutions Designed for Your Business at the Most Affordable Prices
